

Beginners Auto Mechanics

A must for every vehicle owner and driver — no experience needed.

HANDS-ON TRAINING IN TUNAPUNA · CERTIFICATE ON COMPLETION

A practical, hands-on course covering the fundamentals that save you money and time, and that put you on equal footing with your mechanic. You will work on real vehicles in our Tunapuna workshop from the first session.

STARTS	**Saturday 31 October 2026**
SCHEDULE	**Saturdays, 9:00am - 12:00pm**
DURATION	**6 weeks**
FORMAT	**In person, Tunapuna workshop**
MINIMUM AGE	**13 years**
COURSE FEE	**TT$2,000 + TT$300 registration**

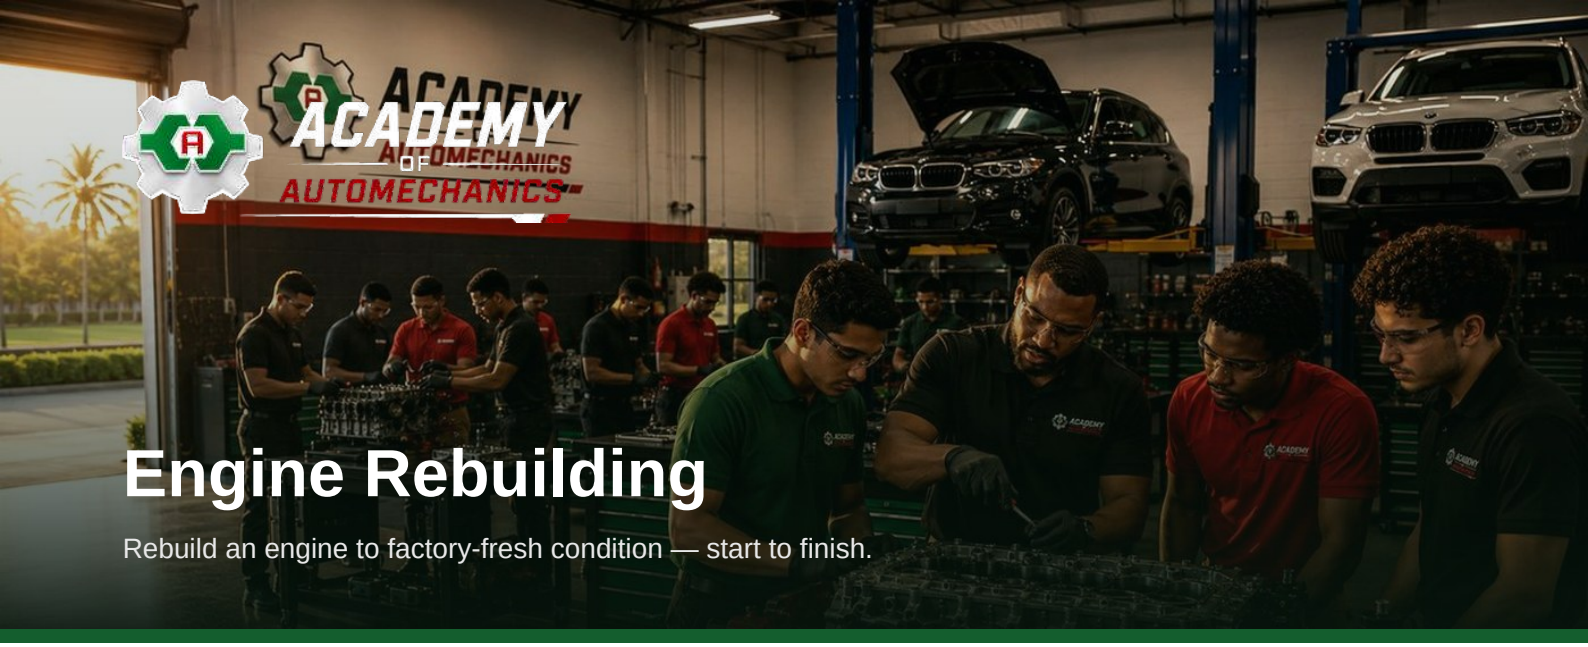

WHAT YOU'LL COVER

- How the engine works
- Fuel system
- Ignition system
- Lubrication system
- Cooling system
- Electrical system
- Brake system
- Steering system
- Suspension system

To register: registration form + copy of ID + passport photo + registration fee.
Bank transfer, Linx or online transfer — no cash. Tuition is due only when the course starts.
Returning students: registration fee waived while the offer lasts.

Engine Rebuilding

Rebuild an engine to factory-fresh condition — start to finish.

HANDS-ON TRAINING IN TUNAPUNA · CERTIFICATE ON COMPLETION

Over three months you take an engine from diagnosis to full rebuild. Students test an engine to determine the mechanical condition of its internal components, strip it down, clean and examine every part against manufacturer's specification using precision measurement tools, and are walked through the decision-making process before rebuilding it. This is a hands-on course, and students love it.

STARTS	**Saturday 16 January 2027**
SCHEDULE	**Saturday evenings, 6:00pm - 9:00pm**
DURATION	**3 months**
FORMAT	**In person, Tunapuna workshop**
COURSE FEE	**TT$5,000 + Registration TT$500**

WHAT YOU'LL COVER

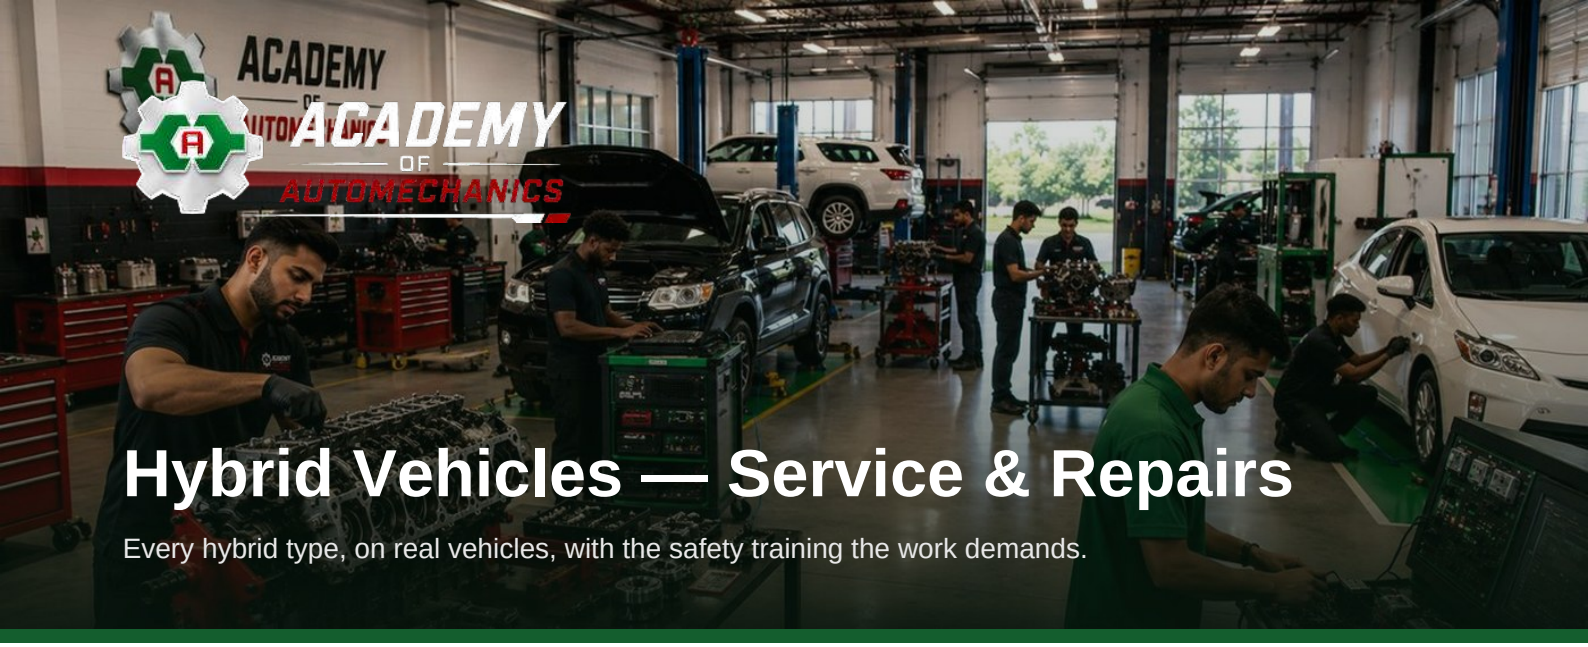

- Testing an engine to assess internal mechanical condition
- The full disassembly process
- Cleaning, inspection and measurement to manufacturer's specification
- Using precision measurement tools
- The rebuild decision-making process — repair, machine or replace
- Complete engine reassembly
- Written exam at the end of the course
- Certificate awarded to successful candidates

Hybrid Vehicles — Service & Repairs

Every hybrid type, on real vehicles, with the safety training the work demands.

HANDS-ON TRAINING IN TUNAPUNA · CERTIFICATE ON COMPLETION

Covers all types of hybrid: mild hybrid, hybrids with range extender, plug-in hybrids and full hybrids. The course includes a great deal of practical training — different cars are brought into the workshop for full service, so students gain experience across a variety of vehicles rather than a single model.

STARTS	**Thursday 21 January 2027**
SCHEDULE	**Thursdays, 6:00pm - 9:00pm**
DURATION	**3 months**
FORMAT	**In person, Tunapuna workshop**
COURSE FEE	**TT$6,000 + Registration TT$500**

WHAT YOU'LL COVER

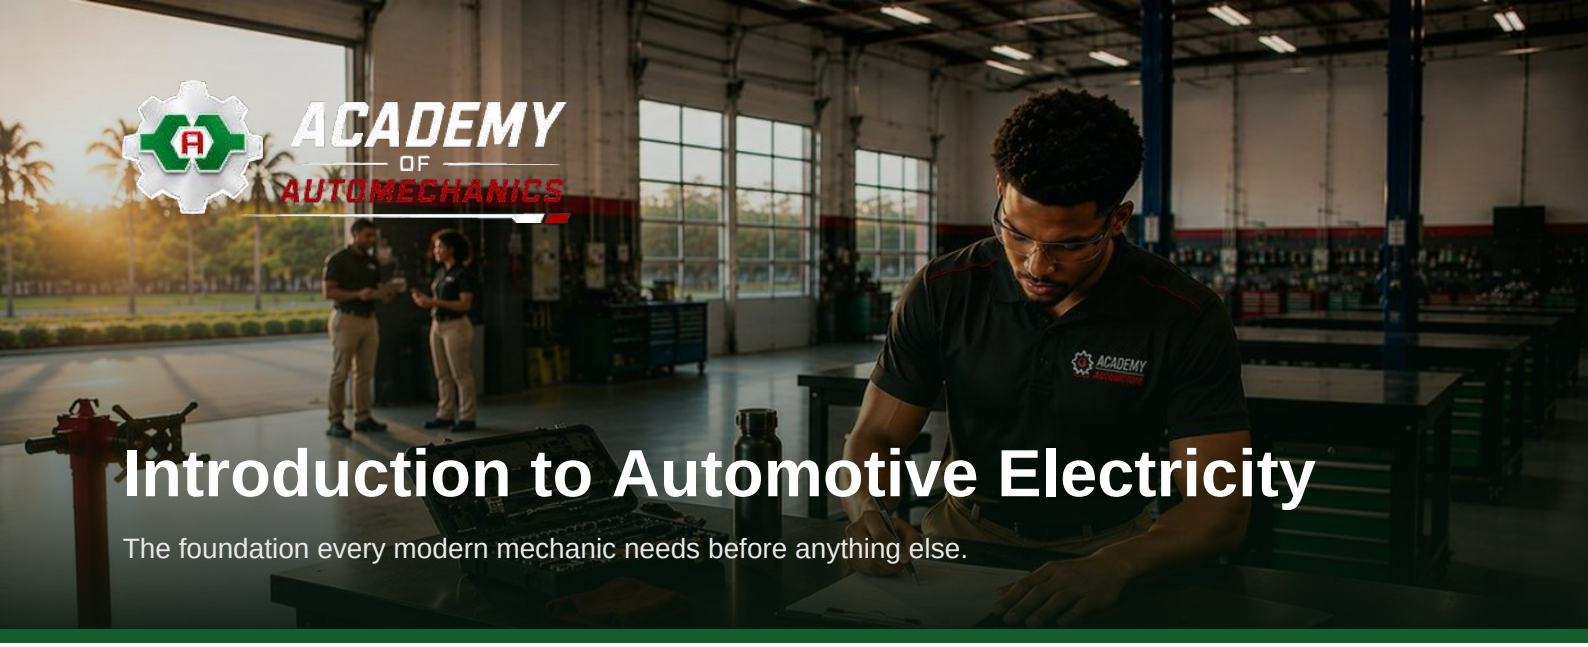

- What makes a hybrid different from a conventional car — an overview
- Safety and tools for high-voltage work
- Service and maintenance issues
- Transmission technology
- Regenerative braking
- Motor/generator controls and the inverter
- Electric power steering and DC-DC converter operations
- High-voltage air conditioning, heating and cooling systems
- Battery systems, high and low voltage

Hybrid and EV work is where the trade is heading — and where trained technicians are scarcest.

Introduction to Automotive Electricity

The foundation every modern mechanic needs before anything else.

HANDS-ON TRAINING IN TUNAPUNA · CERTIFICATE ON COMPLETION

Modern vehicles rely heavily on complex electrical systems controlling everything from engine performance to safety features. Understanding voltage, current, resistance and circuits provides the foundation for diagnosing and repairing those systems. Without it, mechanics struggle with electronic diagnostics, sensor operation and hybrid systems. This course gives you that grounding, so you can approach advanced study with confidence and make fewer costly errors.

STARTS	**Ask us for the next intake date**
SCHEDULE	**Tuesdays, 6:00pm - 9:00pm**
DURATION	**6 weeks**
FORMAT	**In person, Tunapuna workshop**
COURSE FEE	**TT$3,000 + Registration TT$500**

WHAT YOU'LL COVER

- Working with multimeters
- Types of circuit
- Resistance and resistors
- Ignition system and magnetism
- Sensors and actuators
- Charging and starting systems

The recommended starting point before Master Electrical, Electronics & Diagnostics.

Master Electrical, Electronics & Diagnostics

The single biggest advantage a working technician can give themselves.

HANDS-ON TRAINING IN TUNAPUNA · CERTIFICATE ON COMPLETION

Every system in today's vehicles is integrated by electronics. Technicians who study electricity and electronics properly hold a major advantage over those who do not — this is the course that pays for itself fastest if you are already turning wrenches, because modern diagnostics is where the money is.

STARTS	**Monday 18 January 2027**
SCHEDULE	**Mondays & Wednesdays, 6:00pm - 9:00pm**
DURATION	**3 months**
FORMAT	**In person, Tunapuna workshop**
COURSE FEE	**TT$6,000 + Registration TT$500**

WHAT YOU'LL COVER

- Principles of electricity
- Understanding electrical circuits
- Working with wiring diagrams
- Understanding and working with semiconductors
- Principles of electrical system repairs
- Building basic electronic circuits
- Using electrical equipment to diagnose and fix electrical faults
- Testing and diagnosing electrical and electronic systems
- Using oscilloscopes and other diagnostic equipment
- Extensive practical work, on and off the vehicle

City & Guilds Level 2 Diploma

Light Vehicle Maintenance & Repair Principles — internationally recognised.

HANDS-ON TRAINING IN TUNAPUNA · CERTIFICATE ON COMPLETION

For individuals who want to develop the practical skills and technical knowledge required to work as a light vehicle service technician. It covers the inspection, servicing, maintenance, diagnosis, removal, replacement and repair of vehicle systems and components. This is our flagship programme — the only one that covers every course we offer, and more. You do not need to complete our Beginners course first.

STARTS	**Monday 18 January 2027**
SCHEDULE	**3-4 evenings a week, 6:00pm - 9:00pm**
DURATION	**18 months**
FORMAT	**In person, plus one day online**
ENTRY REQUIREMENT	**No prior course needed**
FEES	**Discussed on your consultation call**

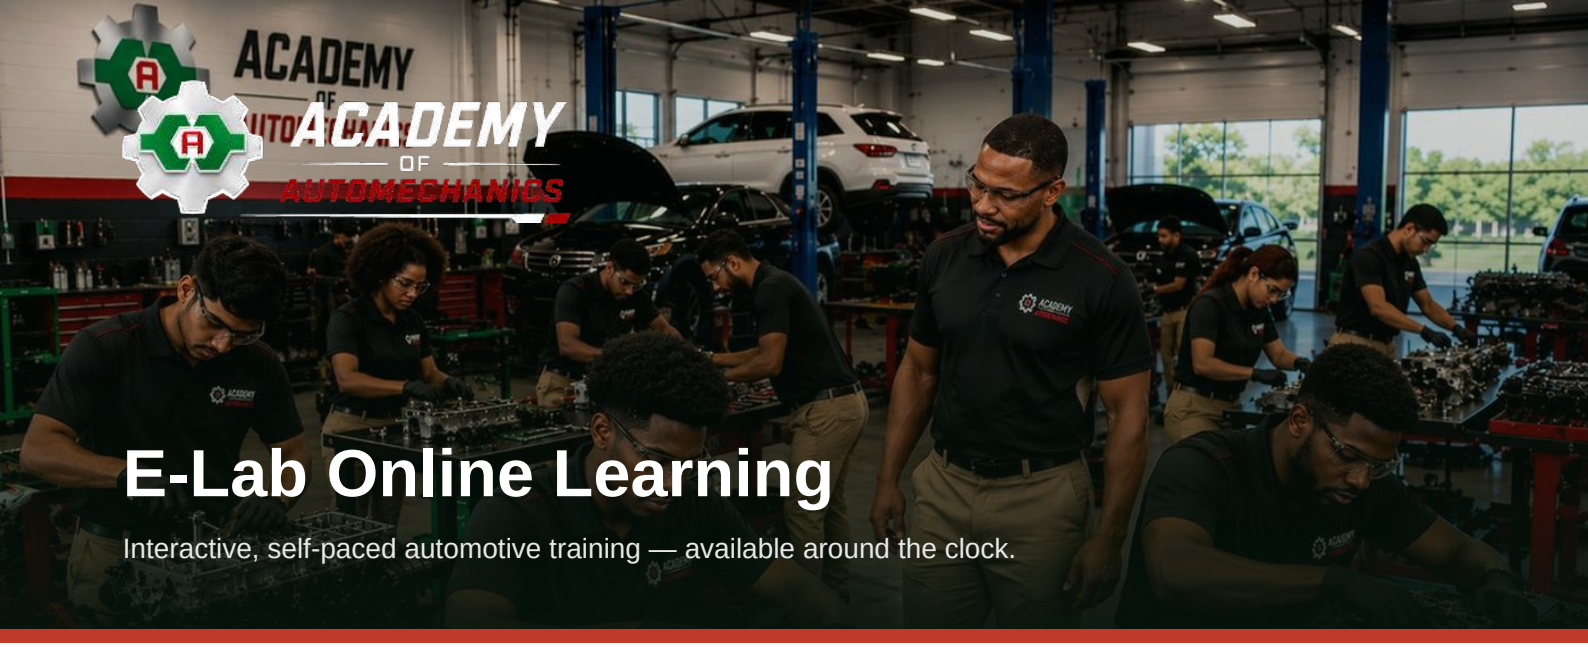

WHAT YOU'LL COVER

- Health, safety and good housekeeping in the automotive environment
- Supporting job roles and working relationships in the workshop
- Routine vehicle maintenance
- Engine systems and components
- Electrical and electronic systems
- Chassis systems — brakes, steering and suspension
- Vehicle inspection procedures
- Use of hand tools, workshop equipment and safe working practices
- Removal and replacement of vehicle components
- Professional communication and documentation, including job cards and reports
